Dark ERA

Short Description

Virtual Instrument with Ancient Nordic Instruments, Pulsating Pads, and Evolving Atmospheric Soundscapes - Mac/PC AAX, VST, AU, Standalone

描述

The Sound of the Vikings

If you're a film, TV, or game composer whose music tends to the exotic, Sweetwater has a virtual instrument library that will take your music to long-lost, faraway places. For Best Service Dark Era, Eduardo Tarilonte — master of mystical sounds — set out to capture the sonic essence of Scandi-style scoring with a goose-bump-inducing collection of the most unique sounds that take your music back to a dark age when legends were born and Nordic pagan gods determined the fate of humankind. Get ready for the sound of the Vikings.

A deep dive into ancient pagan music

From the comfort of your MIDI controller, deploy haunting rhythmic and ambient soundscapes with thunderous ritualistic percussion, gut-stringed lyres, Nordic bone flutes, mystical throat chants, the overtone flute fujara, the transcendental drones of the ancient tagelharpa, fearsome war horns such as the wooden lur, and more. The instruments of Dark Era are complemented and fortified by a supremely useful collection of pulsating pads and evolving atmospheric soundscapes. Take a deep dive into ancient pagan music with Best Service Dark Era.
