World-class Choirs — Singing Your Lyrics!

描述

World-class Choirs — Singing Your Lyrics!

Quantum Leap Hollywood Choirs unleashes the next generation of powerful cinematic vocals pioneered by EastWest's Symphonic Choirs, released in 2005. Produced by Doug Rogers and Nick Phoenix at their historic EastWest studios on Sunset Boulevard, Hollywood Choirs features unshackled dynamics and stunning realism that opens up a brave new world of choral possibilities. The WordBuilder plug-in lets you type in any words — in any language — and have them sung back to

you by the full choir or individual male and female sections. The choirs' ability to sing any word or phrase has been significantly improved, resulting in startling realism; and more sound options have been added to assist you in sculpting the sound to your requirements.
