Miroslav Philharmonik 2

概要描述

The new orchestra with legendary soul

描述

The most emotional orchestral collection ever

Strings that soar, woodwinds that dance, brass that commands and a full symphony orchestra of sounds at your fingertips — all expertly performed with musical articulations for real music played by real musicians. From flowing legatos to animated pizzicatos, from aggressive spiccatos to elegant staccatos, from the most subtle pianissimo to the most triumphant fortissimo and more, Miroslav Philharmonik 2 is a sweeping vision from a master artist embodied in a new virtual instrument that brings the orchestra to life. It's not enough to just have good

recordings of classical instruments. For a true symphonic experience, you need instruments performed by the absolute best musicians articulated in just the right way directed by a producer and conductor who knows the fine art of making living, breathing samples. Miroslav Vitous pioneered the concept of a complete symphonic sample library for real composers, and now he has taken it to the next level.
