如果你希望制作真实的吉他独奏和伴奏，我们的RealGuitar定是你需要的。

## 描述

---

如果你希望制作真实的吉他独奏和伴奏，我们的RealGuitar定是你需要的。RealGuitar是款基于采样的虚拟乐器，拥有创新的吉他声音建模，可以在键盘上模仿吉他的演奏手法。

RealGuitar 5结合了两件乐器：经典 - 我们原来所有的吉他模型，搭配全新功能；钢弦 - 三种音色的全新吉他采样组，各自有三种调音方式。

If you are serious about creating truly realistic sounding solo and accompaniment guitar stuff for your songs, our product called RealGuitar is just what you need. RealGuitar is a sample-based virtual instrument with an innovative approach to guitar sound modeling and guitar part performing on keyboard.

RealGuitar 5 is a combo of two instruments: Classic – all of our original guitar models with loads of new features, and Steel String – the debut of new guitar sample set with five patches and three tunings for each.

What's New in version 5.

The true power of RealGuitar lies in brand new technologies incorporated in this innovative guitar performance tool:

The unique Multi Performance technology allowing to easily switch between strumming, soloing, string picking performance techniques, using just the velocity of pressed keys.

Song Mode turning RealGuitar into a powerful and easy-to-use songwriting tool allowing you in no time create perfect guitar backing tracks for your songs. Simply insert chord symbols and rhythm patterns into the built-in Song Track - and your guitar part is ready!

Advanced Humanize section of RealGuitar allows to easily add realism to the performance, both live and step-recorded in a MIDI track, or automatic.

Our original Floating Fret Position technology, which imitates change of fret position of a guitarist's hand on the neck. This gives you the possibility of playing on up to 104 guitar frets using just 43 keys of a standard keyboard!

Our original Guitar Touch technology letting you easily imitate basic guitar techniques (strumming, plucking, sliding, bending, muting, etc.), using standard MIDI keyboard and MIDI controllers, such as Pitch Bender, Modulation Wheel, Sustain Pedal, Aftertouch.

Guitar Rhythm Pattern technology providing powerful Pattern Manager completed with huge MusicLab Guitar Pattern Library for easily creating guitar accompaniment tracks. All you have to do is to find the appropriate rhythm pattern(s) in the Pattern Manager tree view, copy it to the needed number of measures, start your sequencer and use MIDI keyboard to play chord changes, or alternatively add chords to a MIDI track via sequencer's editor.

These technologies allow to closely emulate live guitar sound and techniques, letting you perform guitar parts with a whole new level of realistic expression.
