MasterComp

概要描述

Hi-Fi+stereo+mastering+compressor

描述

PSP MasterComp is a high fidelity stereo dynamics processor (plug-in VST, RTAS and AAX for Windows; AudioUnit, AAX, RTAS, VST for Mac OSX Universal Binary). Its double-precision (64-bit floating point) and double-sampled (FAT - Frequency Authentication Technique) processing offers transparency even at extreme compression settings and high sample rates.

PSP MasterComp installer includes two version of the plug-in:

- PSP MasterComp - which is mainly designed for mastering compression and expansion and
- PSP MicroComp - disigned for using on buses and track processing during mixing.
