Hummingbird

## 概要描述

Ultra Real-sounding Virtual Acoustic Guitar - Gibson® 1963 Hummingbird 的真实音效，包括约 80GB、89,000 个采样

## 描述

Uncredible real-time playability - Hummingbird SPI (Super Performance Instrument)

With Hummingbird SPI, you can play ultra realistic acoustic guitar performance in real-time. You can access various playing techniques instantly without stopping your performance and create convincing guitar tracks very quickly.

Single note, Emulated 2-strings dyad chords (minor 2nd, 2nd, minor 3rd, major 3rd, 4th, flat 5th, 5th, #5th, 6th, 7th, maj7th, octave), Sampled real chords (octave, major, minor, 7th, m7, maj7, add9, sus4, 9th, m7(9), maj7(9), dim7, aug, open / low chords, etc.), Emulated chords (major, minor, 7th, m7, maj7, add9, sus4, 7sus4, 9th, #9, m7(9), maj7(9), dim, dim7, m7-5, aug, open / low chords, etc.), User chords (You can

make any chords using User Chord Editor.), Realtime Hammer-on & Pull-off, Realtime Legato Slide, Vibrato, Trill, Picking Tremolo, Mute & picking noise, Gliss down, Natural Harmonics, Percussion, Fret noise, Pick stop noise, Bridge mute noise, Release noise, Position change noise, Special FX, etc..

You can play ultra realistic acoustic guitar performance in real-time!

### Fretboard Monitor

The SPI automatically selects a proper string / fret position depending on the situation. You can also change the string manually by key switches. The Fretboard Monitor visualizes the current fret position / playing technique you are playing.

### Intelligent Instrument Key Switch with chord recognition

You can instantly select an instrument (articulation) using the Instrument Select Key Switches. All the instruments can be assigned to any key switches and you can create your own key switch mapping. The key switches have a chord recognition feature that enables you to select a chord instrument by not only hitting a key that the chord is assigned, but also by hitting the chord notes in the key switch range. In other words, you don't need to memorize the key switches for the chord instruments. Just hold the chord notes in the key switch range, and you are ready to play the chord.

### Real sampled chords

The extensive number of the 'real' chord samples makes your guitar tracks very convincing. (octave, major, minor, 7th, m7, maj7, add9, sus4, 9th, m7(9), maj7(9), dim7, aug, open / low chords, etc.) Hummingbird includes the huge number of 'real' recorded (in other words, 'pre-recorded' or 'pre-played') chord samples. You can instantly access the various types of guitar chords. Prominy's guitar libraries are the only ones that include such a huge number of the real chord samples.

### Real emulated chords

Though Hummingbird already includes a huge number of real chord samples, more chords (and more chord shape variations per each chord) are available with the emulated chords. Our unique recording / programming make it possible for you to get a realistic chord sound that is close to a real sampled chord sound, even if you are playing emulated chords.

minor 2nd-dyad , maj2nd-dyad, minor 3rd-dyad, major 3rd-dyad, 4th-dyad, flat 5th-dyad, 5th-dyad, #5th-dyad, 6th-dyad, 7th-dyad, maj7th-dyad, octave-dyad, major, minor, 7th, m7, maj7, add9, sus4, 7sus4, 9th, #9, m7(9), maj7(9), dim, dim7, m7(b5), aug, open / low chords, etc.

### User Chord

User Chord Editor enables you to build your own chord shapes and make any chords you like. Each string is fully customizable and you can configure how the string is played using the User Chord Editor. (For example, normal sustain or mute or picking noise, always play open string regardless the fret position, strum the string or not, root string, etc.)

A large number of guitar percussion samples

Hummingbird includes a larger number of percussion samples (hitting, tapping, knocking the various part of the guitar's body) that enable you to play and create percussive and rhythmic guitar tracks.

Customizable Strum Key

As well as the User Chord Editor, you can configure how each string is played when you hit the Strum Keys and the Normal Key.

Arpeggio Key

Arpeggio Key is a dedicated key for each string. When a chord instrument is selected, each note of the chord is automatically assigned to the Arpeggio Key for the string so you can play arpeggio with the keys.

\*This is not a so-called 'Arpeggiator'. This is a feature that enables you to play a certain note (string) of the chord individually.

True stereo recording

The samples were recorded using three microphones; a pair of small diaphragm microphones for stereo recording, and one large diaphragm microphone for monaural recording. As a stereo option for the large diaphragm microphone, a Double-Tracking instrument is available (see below).

Double-Tracking

In addition to the stereo recorded samples that capture a natural stereo sound, Double-Tracking instruments are available as another option to get a stereo sound. 'Double-Tracking' is a technique that is frequently used in recording guitar tracks. It gives the guitar track a nice, wide-spread stereo images and thickness. With Hummingbird SPI, you can reproduce it very easily just by loading the double-tracking instruments. No identical samples are played simultaneously in both channels. You don't need a stereo delay or tweaking your midi data to emulate the double-tracking.

Realtime Legato Slide / Realtime Hammer-on & Pull-off

With Hummingbird's Realtime Legato Slide feature using 'real' legato samples, you

are able to get perfectly real expressions of the human finger's legato slide that cannot be reproduced with a slide emulation by changing pitch. Hammer-on & Pull-off samples are real recorded samples as well. Realtime Legato Slide is available with all the instruments including chord instruments except FX instruments and Percussions. Realtime Hammer-on&Pull-off is available with single note instrument.

### Auto Stroke Detection

With the SPI's Auto Stroke Detection feature, SPI automatically detects the current beat position and identify proper stroke direction (down or up). There are several stroke detection modes and you can also control stroke direction manually.

### NKS (Native Kontrol Standard®) ready

Hummingbird officially supports NKS (Native Kontrol Standard®) that allows for intuitive and seamless interaction between Hummingbird and KOMPLETE KONTROL and MASCHINE hardware. You can control major parameters via KOMPLETE KONTROL S series keyboard / Maschine hardware and software. KOMPLETE KONTROL S series keyboard's Light Guide shows available key switches, playable key ranges of each articulation.

### Other features

- Expansive number of playing techniques, extreme power of expression that no other acoustic guitar library has captured before
- Kontakt Player included -No sampler required!
