QSB115

概要描述

超低音音箱

描述

The astonishing QSB115 can be powered by the SBC800 Controller/Amplifier for studio use, or the AP amplifiers for bigger spaces. It is the perfect partner for the Quested V3100 in stereo and 5.1 configurations, or will integrate with any of the LT systems. A 30mm rigid plywood structure grips our custom 15" driver with its 4" voicecoil and a 3.5kg Ferrite magnet delivering graceful low-end notes with unnerving accuracy. Intelligent cabinet design minimises the size of the QSB115 and a clever "midi" stand has been designed to couple the V3110/VH3208 to the QSB115 for a very elegant 4-way system.
