过去二十年里，Lexicon 480L数字效果系统直都混响处理的标准。Lexicon 480L是高制作人完成高水准任务时常用的选择。即便到了今天，Lexicon 480L依然被认为是音质好的混响之。

在次接触他们的产品线时，Relab Development决定制作个可以替代这款传奇硬件混响的精准模型。LX480插件采用了相同的混响技术，引入了更高密度的模式和原版没有的新功能。

LX480将为未来的混响插件设立新的标准。

For over two decades, the Lexicon 480L Digital Effects System\* has been the standard by which all other signal processors are measured. The Lexicon 480L\* remains a popular choice among top producers for the most demanding tasks. Even today the Lexicon 480L\* is widely considered as one of the best-sounding reverbs ever built.

When creating the first entry for their own product line, Relab Development decided to create the most accurate emulation that could replace this legendary hardware reverb. The LX480 plugin goes far beyond emulation by using the exact same reverb technology and introducing higher density modes and functions not found on the original.

The LX480 will set the new standard for reverb plugins in the future.
