DriveRack 260

概要描述

EVERYTHING you need for complete control of your PA system

描述

EVERYTHING you need for complete control of your PA system

The 260 capitalizes on the road tested and contractor approved DriveRack, providing state-of-the-art signal processing while utilizing a simple and intuitive user interface. It offers two independent channels of processing power with a linkable 28-band Graphic Equalizer, industry-standard dbx stereo compressor module, feedback eliminator and the 120A Subharmonic Synthesizer on the input, with a six channel output system that includes parametric EQs, PeakStopPlus limiters (to provide protection against speaker blowouts) and alignment delay.

These features combined with the Wizard setup system and complete DriveWare GUI control represent a methodical design that is guaranteed to deliver optimal, all-inclusive processing in a completely scalable system. The 260 provides full bandpass and crossover configurations as well as independent output processing and a full time RTA for live sound applications. Contractors will appreciate its control inputs for wall-panel logic control and the patent-pending Advanced Feedback Suppression.
